Junior Full-Stack Developer — MERN — WordPress Plugin Development — TypeScript — CI/CD — SaaS Systems  
Full Work Rights — Available Full-Time

---

## Professional Summary

Junior Full-Stack Developer experienced in building SaaS-style MERN applications, authentication flows and automation workflows. Skilled in MVC architecture, reusable component patterns, CI/CD pipelines and containerised deployments. Currently developing a production-grade internal plugin system and previously built a logistics automation platform reducing manual workload by **70%**. Motivated to learn, collaborate and contribute in Agile engineering teams.

---

## Technical Skills

**Frontend:** React, Redux, JavaScript, TypeScript, Material-UI, Tailwind

**Backend:** Node.js, Express, REST APIs, JWT

**Architecture:** MVC, Modular Design, Component-Based Development

**Database:** MongoDB, Mongoose, SQL

**DevOps/Cloud:** Docker, GitHub Actions, AWS, CI/CD Pipelines

**Testing:** Jest, Postman

**Tools:** Git, WordPress Plugin Dev, Vercel, Render, Agile/Scrum

---

## Work Experience

### Softlabs — Full-Stack Developer Intern — Sydney — Nov 2025 – Present

- Developing a custom community submission and tracking system as a WordPress plugin using TypeScript and PHP.
- Implementing dynamic form rules (anonymous vs identified submissions), validation logic, attachments, and workflow automation.
- Creating backend structures including custom DB tables, REST API endpoints, and admin panel functionality.
- Building an admin dashboard for request status management, filtering, and viewing detailed submissions.
- Working with Git branching, code reviews, CI/CD workflows and agile sprint ceremonies.

**Tech:** TypeScript, PHP, WordPress (Custom Plugins), REST API, React (Admin UI), Docker, Git, GitHub Actions

### Xflyve Logistics — Automation Developer — Sydney — Oct 2024 – Sep 2025

- Built a SaaS-style automation platform replacing spreadsheet-based workflows.
- Implemented authentication, protected routes, file upload workflow, and operations dashboard using MERN stack.
- Designed the backend using MVC structure and modular scalable folder structure.
- Automated deployment using Docker and GitHub Actions.
- Reduced operational workload by **70%**.

**Tech:** React, Node.js, Express, MongoDB, JWT, Cloudinary, Docker, GitHub Actions
